Automatic mode, the grind function is activated by a photocell when the filter holder is placed on the fork. Dosage is pre-selected using the touch screen.

Manual mode, once the filter holder is placed on the fork, the grind function is activated by selecting the required dose on the touch screen.

Wireless version, the machine interacts automatically via Bluetooth with the coffee machine in order to obtain the best in-the-cup result.

Wireless BDS version is use for more than one grinder - dosers per machine
